

Custom Skin Compounding

Prescription-strength formulas tailored to your skin's needs.

✓ PHYSICIAN-PRESCRIBED · CUSTOM-COMPOUNDED · TOPICAL

Commercial skin care products offer fixed concentrations in one-size-fits-all formulas. Your skin isn't one-size-fits-all. The Medicine Shoppe compounds **prescription-strength topical preparations** in the exact concentrations your dermatologist or physician prescribes — targeting hyperpigmentation, aging, rosacea, and skin conditions that over-the-counter products simply can't address.

What We Compound

Hyperpigmentation & Melasma

- Hydroquinone
- Tretinoin
- Fluocinolone
- Kligman triple combination
- Kojic acid
- Azelaic acid

Anti-Aging & Retinoids

- Tretinoin
- Retinol combinations
- Vitamin C (L-ascorbic acid)
- Niacinamide blends
- Peptide formulations
- Custom serums

Rosacea & Skin Conditions

- Ivermectin
- Metronidazole
- Azelaic acid
- Low-dose corticosteroids
- Combination formulas
- Soothing base options

Why Compounded Beats Commercial

- Exact Strength**
Commercial tretinoin comes in 0.025%, 0.05%, 0.1%. We make 0.04%, 0.07%, or whatever your skin needs.
- Combination Formulas**
Hydroquinone + tretinoin + steroid in one cream. One application instead of three products.
- Customized Base**
Sensitive skin? We choose the right base — no fragrance, no irritants, no unnecessary additives.
- Unavailable Elsewhere**
Some formulas (like the Kligman triple combination) aren't commercially available at effective strengths.

Custom Compounded at The Medicine Shoppe

Creams, gels, serums, or ointments · any base, any strength

Prescription required · 30-day supply

Could This Be Right for You?

- You have melasma, dark spots, or uneven skin tone that OTC products haven't cleared
- You want prescription-strength retinoids at a concentration tailored to your skin
- You have rosacea, redness, or a skin condition requiring a targeted formula
- Your dermatologist or doctor has recommended a compounded preparation

Ask your doctor about custom compounded skin therapy.
