

# Veterinary Compounding

Custom medications made specifically for your dog or cat.

✓ DOGS & CATS · CUSTOM FLAVORS · MULTIPLE DOSE FORMS

Getting your pet to take their medication shouldn't be a struggle. At The Medicine Shoppe, we compound custom medications tailored to your pet's exact dose, in a flavor they'll actually accept — and in the form that works best for them. **Your vet prescribes it. We make it. Your pet gets better.**

## Why Compounding for Pets?

Many medications aren't commercially available in pet-friendly doses, flavors, or forms. A dog that weighs 8 lbs needs a very different dose than one that weighs 80 lbs — and cats famously refuse medications that taste or smell wrong. Compounding lets us create the **exact right dose in a form your pet will accept**, solving the problem before it starts.

## Available Dosage Forms

- Flavored Chews & Treats**  
Medicated chews that look and taste like a treat — great for dogs.
- Oral Liquids & Suspensions**  
Easy-to-dose liquids, often the best choice for cats and small dogs.
- Transdermal Gels**  
Applied to the inner ear flap — ideal for cats that resist all oral dosing.
- Capsules & Tablets**  
Custom-strength capsules when precise dosing is the priority.

## Popular Flavors

- Beef
- Chicken
- Fish
- Marshmallow
- Peanut Butter
- Banana

## Common Conditions We Compound For

- Pain & arthritis (anti-inflammatories)
- Anxiety & behavioral issues
- Seizure management (phenobarbital)
- Urinary issues & incontinence
- Thyroid disorders (methimazole for cats)
- Skin & ear infections (topical antibiotics)
- Heart & blood pressure medications
- Gastrointestinal motility disorders

### Ask Your Vet to Send Us a Prescription

We work directly with your veterinarian to prepare every compound.  
*Questions about a specific medication? Call us — we love to help.*
