

# Estradiol 0.02% Vaginal Cream

Targeted estrogen therapy — less product, better base, better results.

✓ BIOIDENTICAL · ELLAGE™ BASE · PHYSICIAN-PRESCRIBED

Vaginal estrogen is one of the most effective treatments for genitourinary symptoms of menopause — dryness, discomfort, painful intercourse, and recurrent infections. Our compounded estradiol 0.02% vaginal cream delivers **prescription-strength bioidentical estradiol in a fraction of the volume** of commercial products, formulated in PCCA's premium Ellage™ base for superior comfort and tolerability.

## Why the Base Matters: PCCA Ellage™

Ellage™ is a specially engineered vaginal base from PCCA (Professional Compounding Centers of America) — the gold standard in compounding pharmaceuticals. Unlike conventional cream bases, Ellage™ is **specifically designed for vaginal tissue**: it spreads evenly with minimal volume, is non-greasy, bioadhesive, and pH-balanced to match the vaginal environment. It enhances estradiol absorption while minimizing irritation and mess.

## The Ellage™ Advantage

- Less Is More**  
Effective dose in just 0.5 gm — half the volume of a typical commercial cream application.
- Superior Tolerability**  
pH-balanced and non-irritating to sensitive vaginal tissue. Gentler than standard cream bases.
- Better Absorption**  
Bioadhesive properties help the base stay where it's applied, improving estradiol uptake.
- No Mess**  
Non-greasy, low-volume application is discreet and comfortable — patients report far better compliance.

## How It Compares

Feature	Our Estradiol 0.02% / Ellage™	Commercial Estrogen Cream
Dose volume	<b>0.5 gm — minimal, targeted</b>	1 gm per application
Base quality	<b>PCCA Ellage™ — purpose-built</b>	Standard generic cream base
Tolerability	<b>pH-balanced, non-irritating</b>	Often causes burning or discharge
Cost	<b>\$65 / month</b>	Typically \$80–\$150+ / month

### Estradiol 0.02% Vaginal Cream / Ellage™ Base

Typical dose: 0.5 gm vaginally 3x/week, or as directed  
30-day supply · Prescription required

## Could This Be Right for You?

- You experience vaginal dryness, discomfort, or pain with intercourse
- You've had irritation or side effects with commercial estrogen creams
- You want a lower-volume, cleaner, better-tolerated vaginal estrogen option
- Your doctor has recommended local vaginal estrogen therapy
