

*Activation: 2019 Cyclone Fani*

*Situation Report 1 - Period Covered: May 3, 2019*

*Prepared by: Humanity Road*

---

### *Situation Overview Highlights:*

Ten thousand villages and 52 Urban Local Bodies (ULBs) are likely to be affected by cyclonic storm Fan [source](#). There are approximately 36 million in the path of Category 1 or higher conditions. Cyclone Fani was upgraded to a category 5 cyclone on 2 May and is expected to be the most severe cyclonic storm since the super cyclone of 1999 which killed 10,000 people. [Source](#). Hurricane force winds and significant waves battered more than 600 miles of shoreline of Odisha and Bengal and West Bengal, India. More than a million people were shifted to safer areas as "extremely severe" cyclone Fani made landfall near Odisha's Puri on Friday morning. Energy infrastructure in Odisha has been completely destroyed and restoration will be a challenging task. The storm has now moved out of Odisha coast and heading to nearby states affecting weather of several countries in the Asian subcontinent. [Source](#)

Humanity Road activated its disaster desk in advance of landfall of Cyclone Fani. This situation report number 1 contains helpful resource links and useful information based on early indications in social media.

## Situation Overview

Almost 1 million people have been evacuated to temporary shelters in Odisha as Cyclone Fani - billed as the most severe cyclonic storm since the super cyclone of 1999 -- is expected to make landfall today very close to Puri, home to the famous Jagannath temple. Around 10,000 villages and more than 50 towns lie on its path. All flights from Bhubaneswar have been cancelled from midnight, Kolkata airport will be shut between 9.30 pm on Friday to till 6 pm on Saturday. The Railways have cancelled more than 200 trains that pass along the coast. On Saturday, the cyclone is likely to move along the Bengal coast towards Bangladesh. [Source](#)

It is very likely to continue to move north-northeast and weaken further into a severe cyclonic storm during next nine hours. It is very likely to emerge into Gangetic West Bengal as a Severe Cyclonic Storm with wind speed of 90-100 Kmph gusting to 115 Kmph by early morning of 4th May. It is very likely to move further north-northeast and emerge into Bangladesh on 4th May evening as a Cyclonic Storm with wind speed 60-70 Kmph gusting to 80 Kmph. [source](#)
