

Hurricane Harvey

Activation: Hurricane Harvey, Texas, US

Situation Report 3 - (period covered: AUG 29-30, 2017)

Prepared by: Humanity Road / Animals in Disaster

Situation Overview

Today's report contains situational information for 19 of the 58 counties in Texas that were declared a disaster by Governor Abbott, including 14 counties that were approved for Presidential disaster declaration. These 19 counties comprise a combined population of 8,732,935. This report does not contain all impacted counties and should be considered preliminary information based on social media and open sources.

Humanity Road activated to support the public with information and assistance on August 24 following catastrophic impacts and flooding from Hurricane Harvey. Situation reports based on early indications in social media were published on August 25th and August 27th.

On August 27th, Humanity Road was activated via the Humanitarian Network (DHN) charter, along with our partner the StandBy Task Force, to provide support to first response agencies including the United States Coast Guard (USCG). The DHN organizations are providing support to identify and report urgent unmet needs for people impacted by catastrophic flooding in Texas following Hurricane Harvey. Humanity Road also activated our partner Translators without Borders for local foreign language assistance in data-mining and translating key messaging. In the past 72 hours we have reviewed, relayed, or compiled over 1,000 urgent needs incidents. We are working with local, state, national and military coordination channels for both the public and businesses impacted.
