Humanity Road – Peru
Activation: Flooding
Publication Date: Situation Report, No. 3, 23 March 2017

Highlights

Intense rains have caused severe flooding and landslides in 24 of Peru’s 25 regions. 12 regions have been declared in a state of emergency source. It is the worst flooding in two decades, and more storms are expected.

According to INDECI, as of 23 March, 111,283 people are flood victims, 85 have died, 270 have been injured, and 20 are missing source. Peru’s National Emergency Operations Center (COEN) estimates that over 1,000 kilometers of roads have been destroyed and 159 bridges have collapsed source. The Amazon River is almost at flooding point. Water levels are expected to rise in the coming days leading to possible flooding in Maynas province, in the Loreto region source.

More rain is expected over the next 15 days. The regional health directorate in Piura has put its hospitals and clinics on red alert due to the rains, high temperatures, and collapse of basic sanitation. Some areas remain isolated due to washed out roads and bridges, but the government is working to airlift more humanitarian aid to rural areas. MapAction

This Regional Situation Report No 3 is based on reports from social media and includes highlights of the situation, situation reports and maps, social media accounts, and highlights from some of the regions most impacted. New additions since Report No. 2 are in dark blue text and are bilingual (Spanish and English).

Peru Flooding, Regional Situation Report No 3, 23 March 2017

Situation Overview

Background:
Intense rains have caused severe flooding and landslides in 24 of Peru’s 25 regions. 12 regions have been declared in a state of emergency. Source It is the worst flooding in two decades, and more storms are expected. According to the National Emergency Operations Center, 99,475 Peruvians had lost everything since the beginning of the year, while 626,928 had suffered less serious damage to their homes. Source Highways, bridges, and railways have been damaged hindering the flow of aid and leaving some towns stranded. Communications are also out in some areas. Water treatment facilities and sewage pipes have been damaged impacting the water supply. There is a shortage of drinking water in some areas. Some hospitals have been damaged by flooding and/or are in need of supplies and water, and there is the possibility of increased disease outbreaks due to mosquitoes. Source Source

**Huancavelica Region**

- **Region**
  - 22 Mar: El gobernador regional de Huancavelica, Glodoaldo Álvarez, informó que un total de 2,706 viviendas en su región, han sido afectadas por las lluvias y deslizamientos, especialmente en las regiones de Castrovirreyna y Huaytará, donde hay 2,416 personas afectadas por estos fenómenos naturales. Existen intensas lluvias, tenemos por ejemplo 37 establecimientos de salud afectados, 80 locales escolares colapsados, en vivienda tenemos 2,706 afectadas, 220 colapsadas y 476 inhabitables. En cuanto a saneamiento, dijo que registran casi 450 sistemas de agua potable afectados, 167 kilómetros afectados de canales y sistemas de riegos, además de 12 kilómetros destruidos. “No tenemos maquinaria pesada y equipos con los cuales podríamos hacer mucho por la gente porque tenemos pueblos incomunicados como el distrito de Mollepampa, no se ha podido llevar ayuda porque hay lugares bloqueados”, dijo el gobernador. Álvarez recalcó que son tres las provincias de Huancavelica que...
han sido afectadas gravemente por los fenómenos naturales y que necesitan ayuda urgente son: Angaraes, Huaytará y Castrovirreyna. fuente

The regional governor of Huancavelica reported a total of 2,706 homes have been affected by rains and mudslides, especially in the provinces of Castrovirreyna and Huaytara. 2,416 people have been affected, 37 health facilities affected, 80 schools have collapsed, 450 drinking water systems affected, 167 irrigation systems affected and 12 km destroyed. They do not have heavy machinery. Some places are isolated, and they are not in communication with the district of Mollepampa. Angaraes, Huaytara, and Castrovirreyna need urgent help. source
