

Activation: Hurricane Dorian - Bahamas

Situation Report 1 - period covered: September 1 - 2, 2019

Prepared by: Humanity Road / Animals in Disaster

“Hurricane Dorian has caused extensive damage across the islands of Abaco and Grand Bahama in the Bahamas, according to rapid initial assessments from authorities and Red Cross officials on the ground. According to these reports, Dorian’s ferocious category 5 winds and rains have damaged houses and other buildings, leaving many people without adequate shelter. As many as 13,000 houses may have been severely damaged or destroyed. On the island of Abaco, extensive flooding is believed to have contaminated wells with saltwater, creating an urgent need for clean water.” [source](#)

Our Humanity Road disaster desk activated Thursday 12pm local time in advance of landfall. This situation report number 1 contains helpful resource links and useful information based on early indications in social media. Questions can be directed to support@humanityroad.org or call us at 800-951-1951.

Situation Overview Highlights:

The Ministry of Finance is coordinating its response to Hurricane Dorian by preparing exigency orders to allow donated and purchased relief supplies to enter the affected areas [source](#) Major damages are currently reported in the islands of Abaco, Grand Bahamas and Keys located on the hurricane path. Both islands had been severely impacted by hurricane Matthew in 2016.

CDEMA is leading international coordination. With the financial support of the Government of the United Kingdom and on behalf of the Caribbean Development Partners Group on Disaster Management, two Rapid Needs Assessment Teams were deployed to Nassau and a lead was deployed who will be stationed at the National Emergency Operations Centre (NEOC) in Nassau. Recent Updates - September 2, 2019

- **Forecast:** Hurricane Dorian has virtually stalled over Grand Bahama, according to the National Hurricane Center. At 11 am, the eyes of Hurricane Dorian was located 30 miles North-east of Freeport, Grand Bahamas and 108 miles northeast of Bimini. Dorian was located about 136 miles north-northwest of New Providence. [ZNSBahamas242](#)
- **Communications:** Nationwide collapse of connectivity registered in #Bahamas as of 7:30 a.m. UTC (3:30 a.m. local time) knocking out remaining networks; estimated 80% now offline. WFP Emergency Telecommunications cluster personnel are on the ground. [Source](#) [source](#)
- **Airports:** LPIA Nassau Airport is open and operating today, Mon Sept 2 Visit <http://nassaulpia.com> , Grand Bahama Airport is under 5 feet of water, Bahamas Rock Sound Airport located in South Eleuthera district is also covered in water
- **Medical:** The National Emergency Management Agency (NEMA) through the medical authorities indicates that is still assessing the need for medical supplies. The Medical Information and Coordination Cell (CICOM) is monitoring the development of Dorian and potential needs for Emergency Medical Teams to deploy. Two Emergency Medical Teams (EMTs) coordinators from the Pan American Health Organization (PAHO) / World Health Organization (WHO) located in Nassau (Bahamas) and Bridgetown (Jamaica) [source](#)
- **Urgent Needs Summary:**
 - The Defence Force has been dispatched to rescue people in East Grand Bahama if you know anyone who is trapped tell them call 351-9774 so they can get on the rescue list. There are also numbers for the Emergency Operation Centres in Grand Bahama: 351-4902, 351-4903, 351-4904 and you can WhatsApp your location to 557-5202. [source](#)

- Citizens across Abaco and many other regions are calling into ZNS news to report that they are trapped in rising waters or on balconies and need rescue. During an interview this morning ZNSTV announced that no official rescue teams can be launched until winds drop below 40 mph, which is anticipated by tomorrow for Abaco Islands and 24 hours after that for Nassau. Power

Bahamas Power and Light <http://www.bplco.com/> [Facebook](#)

- Sept 2 - 10am UPDATE: BPL is working to restore power in New Providence, but efforts are being hampered by the flooding. A system fault at one of the primary substations – believed to be as a result of moisture ingress – is believed to have led to a chain of

events culminating in a total island wide outage. The BPL team is working feverishly at present to power up the system, balancing load demands with the capacity available in the system with that primary substation still offline. [source](#)
