

## Capability Statment

WWW.MICROWELDINGSOLUTIONS.COM

**PRODYNAMICS** Laser welding applies quick, precise, and accurate welds with extremely low heat input. Our machine is also designed to create a magnified view of the product and move in any direction needed in order to get into difficult spaces. We work with as little as .002" rods and can create material buildup in a few short passes with no pre or post heating. Eliminating any kind of stress or warping of the material is our highest priority

## CORE COMPETENCIES

- Consistently high quality
- Innovation of Cutting-Edge Products
- Exceptional Customer Service
- Collaboration
- Communication
- Flexibility and adaptability
- Interpersonal skills
- Leadership skills
- Organizational skills
- Problem-solving skills
- Teamwork
- Professionalism
- Conflict Resolution
- Emotional Intelligence

## Differentiators

- Operational excellence
- Customer intimacy
- Product leadership
