

# ProDynamics

MOBILE LASER WELDING SERVICES

ProDynamics offers laser welding and various processes to provide solutions for your damaged mold surfaces. Our headquarters is conveniently located in Southeast Michigan and houses a 40 ton crane for your largest projects.

With the latest in laser welding equipment our systems offer the flexibility needed to get the hard-to-reach areas. After the welding has been completed we offer the option to handwork and polish the weld back to whatever finish is required to get the tool back up and running right away.

If there is not time to tear your tool down and ship it to us, we can bring our equipment to you. ProDynamics has built a reputation for being the industry leader in mobile laser welding services. No matter if the tool is located in the press or not we can come on site and make the repair and get you back up and running in no time. Give one of our locations a call to learn more about our mobile capabilities.

For quick turnaround and high accuracy, call us today!

## Laser Welding Services:

As small as .002" rods used

10x magnification with flexible movement

No stress or warping material

Minimum heat input

Generally no pre or post heating

Laser welding has many different applications, including but not limited to: Aerospace, Automotive, Battery, Dental, Electronics, Filtration, Heating/Cooling, Hobby, Industrial, Jewelry, Military, Medical Devices, Plastics, R&D, and much more.
