## NEW Ultra Mist Disinfectant Spray

Offered to Clean Team Customers for Daily Use

A reusable non-aerosol bottle with 360 degree fine mist dispensing to coat surfaces.

Spray and walk away to disinfect door handles, desks, high touch point areas.

- Kills COVID-19
- No wiping necessary.
- Acts like an aerosol but it's environmentally safe.
- Refillable and reusable container.

Customers can use this disinfectant on personal work spaces or in separate departments.

This pressurized unit dispenses a fine mist of disinfectant on surfaces so it's distributed evenly to allow proper dwell time in order to kill COVID-19.

This helps companies fight the spread of germs in between commercial cleanings. The more you disinfect the better, and this gives the customer and their employees a way to help and feel safe.
