

Piroxicam

What does piroxicam use to treat?

Piroxicam is a generic drug for Feldene®. It is a non-selective cyclooxygenase (COX) inhibitor and an anti-tumor drug. It is used primarily to treat bladder transitional carcinoma, as well as other cancers, such as colon, prostate, inflammatory mammary carcinoma, and transmissible venereal tumors in cats and dogs.

What are the side effects of piroxicam on cats or dogs?

The most common side effects are kidney damage, vomiting, and gastrointestinal ulceration which may cause signs like dark, tarry stools and bleeding.

If you suspect any side effects, overdose, or an adverse reaction to piroxicam, call your vet office immediately or [A.S.P.C.A.'s Animal Poison Control Center](#) at 888.426.4435. A change in dose or medication may be warranted based on the determination of the veterinarian.

How do I know if I need piroxicam to treat my cat or dog?

Some signs of some types of cancer that can be displayed in your pet include the following: abnormal swelling that persists or continues to grow. Regularly check your pet's skin for lumps and bumps, sores that do not heal, unexplained weight loss, loss of appetite, and pale gums.

Where can I get Piroxicam to treat my cat or dog?

Piroxicam can be obtained at a veterinary clinic or compounding pharmacy. You will need a valid prescription from your veterinarian if you plan to fill the medication at the pharmacy. Professional Arts Pharmacy has the medication in stock, and we offer local pickup in Ellicott City, Maryland. If you reside in other states, your medication can be shipped and delivered within 1-2 days from the day of ordering. If you have questions about ordering this medication, please give us a call at 443-200-1200 or visit our website at www.WeMakeMeds.com.
