Enrofloxacin

What is enrofloxacin used to treat?

Enrofloxacin is a generic drug for Baytril[®]. It is a broad-spectrum antibiotic that is used to treat many types of bacterial infections such as bone infections, ear infections, sinus infections, pneumonia. Enrofloxacin is FDA approved to use in dogs and cats.

What are the side effects of enrofloxacin on cats or dogs?

The most common side effects of enrofloxacin are digestive upset including vomiting, diarrhea, and lack of appetite. In cats, eye damage that can lead to blindness has been reported on higher doses of enrofloxacin.

If you suspect any side effects, overdose, or an adverse reaction to enrofloxacin, call your vet office immediately or <u>A.S.P.C.A.'s Animal Poison Control Center</u> at 888.426.4435. A change in dose or medication may be warranted based on the determination of the veterinarian.

How do I know if I need enrofloxacin to treat my cat or dog?

Some signs of bacterial infection that can be displayed in your pet include the following: fever, appetite loss, skin lesions, and wound infections, coughing and runny nose, red and runny eyes, digestive upset (diarrhea), and vomiting.

Where can I get enrofloxacin to treat my cat or dog?

Enrofloxacin can be obtained at a veterinary clinic or compounding pharmacy. You will need a valid prescription from your veterinarian if you plan to fill the medication at the pharmacy. Professional Arts Pharmacy has the medication in stock, and we offer local pickup in Ellicott City, Maryland. If you reside in other states, your medication can be shipped and delivered within 1-2 days from the day of ordering. If you have questions about ordering this medication, please give us a call at 443-200-1200 or visit our website at <u>www.WeMakeMeds.com</u>.
