

Tramadol

What is tramadol used to treat?

Tramadol is a generic drug for Ultram®. It is a synthetic opioid used to treat pain in dogs, cats, and other small mammals.

What are the side effects of tramadol on cats or dogs?

The most side effects may include sedation, tremors, dizziness, anxiety, decreased appetite, vomiting, diarrhea, or constipation.

If you suspect any side effects, overdose, or an adverse reaction to tramadol, call your vet office immediately or [A.S.P.C.A.'s Animal Poison Control Center](#) at 888.426.4435. A change in dose or medication may be warranted based on the determination of the veterinarian.

How do I know if I need tramadol to treat my cat or dog?

Some signs of pain and inflammation that can be displayed in your pet include the following: sleeping, weakness, lethargy, vomiting, and decreased appetite.

Where can I get tramadol to treat my cat or dog?

Tramadol can be obtained at a veterinary clinic or compounding pharmacy. You will need a valid prescription from your veterinarian if you plan to fill the medication at the pharmacy.

Professional Arts Pharmacy has the medication in stock, and we offer local pickup in Ellicott City, Maryland. If you reside in other states, your medication can be shipped and delivered within 1-2 days from the day of ordering. If you have questions about ordering this medication, please give us a call at 443-200-1200 or visit our website at www.WeMakeMeds.com.
