

# Sotalol

## **What does sotalol use to treat?**

Sotalol is a generic drug for Betapace®. It is a beta-adrenergic blocker used to treat abnormally fast heart rhythms in cats and dogs. It is frequently used to treat Boxer Dogs with heart disease.

## **What are the side effects of sotalol on cats or dogs?**

The most common side effect is tiredness, fatigue, vomiting, and diarrhea.

If you suspect any side effects, overdose, or an adverse reaction to sotalol, call your vet office immediately or [A.S.P.C.A.'s Animal Poison Control Center](#) at 888.426.4435.

A change in dose or medication may be warranted based on the determination of the veterinarian.

## **How do I know if I need sotalol to treat my cat or dog?**

Some signs of heart disease that can be displayed in your pet include fatigue, shortness of breath, swelling of the limbs from fluid accumulation, irregular heartbeat, rapid weight gain, shortening of the ability to exercise, persistent cough, or wheezing.

## **Where can I get sotalol to treat my cat or dog?**

Sotalol can be obtained at a veterinary clinic or compounding pharmacy. You will need a valid prescription from your veterinarian if you plan to fill the medication at the pharmacy.

Professional Arts Pharmacy has the medication in stock, and we offer local pickup in Ellicott City, Maryland. If you reside in other states, your medication can be shipped and delivered within 1-2 days from the day of ordering. If you have questions about ordering this medication, please give us a call at 443-200-1200 or visit our website at [www.WeMakeMeds.com](http://www.WeMakeMeds.com).

Disclaimer: Not intended to be a replacement for professional veterinarian advice, diagnosis, or treatment. Always seek the advice of your veterinarian with any questions you may have regarding the medical condition of your pet. If you believe your pet has a medical emergency, call, or visit your vet office or your local veterinary emergency hospital immediately.
