

Mycophenolate

What is mycophenolate used to treat?

Mycophenolate is a generic drug for Cellcept®. It is an immunosuppressant drug that is used for transplants and autoimmune disorders, where your pet's body produces antibodies against itself. Mycophenolate is especially used in dogs with immune-mediated hemolytic anemia.

What are the side effects of mycophenolate on cats or dogs?

Adverse effects include diarrhea, vomiting, loss of appetite, and lack of energy.

If you suspect any side effects, overdose, or an adverse reaction to mycophenolate, call your vet office immediately or [A.S.P.C.A.'s Animal Poison Control Center](http://www.aspcapet.org) at 888.426.4435. A change in dose or medication may be warranted based on the determination of the veterinarian.

How do I know if I need mycophenolate to treat my cat or dog?

Some signs of autoimmune disorders that can be displayed in your pet include the following: weakness or lethargy, weight loss, skin ulcer, lack of energy, increased heart rate, fever, jaundice, and discoloration of the eyes, gums, and skin.

Where can I get mycophenolate to treat my cat or dog?

Mycophenolate can be obtained at a veterinary clinic or compounding pharmacy. You will need a valid prescription from your veterinarian if you plan to fill the medication at the pharmacy. Professional Arts Pharmacy has the medication in stock, and we offer local pickup in Ellicott City, Maryland. If you reside in other states, your medication can be shipped and delivered within 1-2 days from the day of ordering. If you have questions about ordering this medication, please give us a call at 443-200-1200 or visit our website at www.WeMakeMeds.com.
