

BLISTER PACKS

Blister Packs - (bubble packs) are the most commonly used packaging for solid oral medications. We currently offer a 30, 60, or 90-day cycle fill.

ABOUT STOLL'S PHARMACY

Since 1956, Stoll's Pharmacy is Waterbury's choice for individual attention provided by caring professional pharmacists and a bilingual staff. Dedicated to providing superior pharmacy services to the local community, nursing homes, group homes, home health agencies and assisted living facilities. We offer a variety of medication management systems to meet our patient's needs.

MEDICATION MANAGEMENT SOLUTIONS

OVERWHELMED? WE HAVE OPTIONS!

FREE PRESCRIPTION DELIVERY & PICK-UP

MEDICATION SYNCRONIZATION

- Synchronize all your prescriptions to be refilled on the same day each month.
- No need to call for prescription refills.
- No worries about running out of medicine.
- One week before your scheduled pick-up or delivery, the pharmacy will call you and we'll review your medications with you
- Our pharmacist will review your order and call your physician if you need a refill.
- We can even coordinate refills for multiple family members, so they are all filled on the same day.
- You'll receive a reminder call from the pharmacy when your refills are ready.

Simplify My Meds

MEDICATION BOXES

At Stoll's Pharmacy, we utilize numerous types of medication box packaging systems. Medication boxes are mostly used by individuals in their own home when they are having a difficult time keeping their medications in order. Medication boxes prepared and delivered by Stoll's Pharmacy dramatically reduce the chance of medication mishaps. We use a standard weekly medication box containing slots for morning, noon, evening, and bedtime dosages. Smaller boxes are also available, containing only morning and evening medications. We will work with each patient to determine the best medication box method.

Medicine · On · Time®
Filled With Confidence

Medicine-On-Time® is a unique form of packaging for medications. The basic building block of Medicine-On-Time is the "time specific" dosage cup. The standard size cup may contain up to six medications for a single administration time. The high capacity cup may contain up to twelve medications for a single administration time. Each cup is sealed and labeled with three things: the patient's name, administration date and time and the dosage cup's content. Dosage cups are packaged by your pharmacist in color coded calendar frames. These reusable frames are prepared in either a monthly or weekly format. The most common format is monthly and each color designates a specific hour of administration.
