

CoolSeal USA

Our SEALED EDGE makes a difference!

LIGHTER • STRONGER • MORE DURABLE • HYGIENIC

-
- Corrugated polypropylene material achieves temperature faster, improving product quality and shelf life
 - Hygienic and certified safe for direct food contact.
 - Proprietary sealed edge technology reduces the potential for bacterial contamination.
 - 100% Recyclable and Eco-Friendly.
 - Proprietary sealed edge technology increases thermal properties.
 - Leak proof and extremely durable.
 - Save on freight with 30% more product per pallet
 - Material will not absorb water and break down in shipping or storage
 - Proprietary sealed edge technology increases strength
 - Made in the USA
Produced in a zero-waste facility in Perrysburg, OH

“Where fish is distributed in a controlled distribution chain, it would be beneficial to use boxes with less insulation, to allow chill temperatures to influence product temperatures”

The Sea Fish Industry Authority
