

## REDUCED COST WITH CoolSeal

- 100% Recyclable into high grade raw material
- All boxes can be made in either leak-proof or draining design
- Engineered to be quickly erected by hand or by machine
- 90% saving in storage volume

## 1 LEAK-PROOF PACKAGING

## INCREASED BENEFITS WITH CoolSeal

- Proprietary technology used to seal the edges trapping air, enhancing thermal capabilities creating a totally impermeable material
- All substances used in the manufacture of CoolSeal boxes have been certified for food contact
- Will not break down or fragment during use, eliminating particle infestation of factory drains
- Meet customer desires for sustainable packaging solutions

## 2 PACKAGED FISH

## INCREDIBLE SAVINGS WITH...

## 3 READY TO SHIP

## COOLSEAL ADVANTAGES:

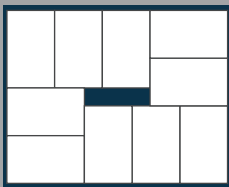

- Reduced storage space devoted to packaging
- Unbreakable and leak-proof base
- Hygienic material
- Safe for direct food contact
- Easy and Fast to erect
- Sealed flutes for enhanced strength and insulating properties
- Savings on waste disposal
- Improved customer satisfaction
- 100% recyclable into high grade raw material
- Meets customer desires for sustainable packaging
- Reduces packaging disposal cost for customers
- CoolSeal vs. EPS; Equal internal volume and substantially lower external volume

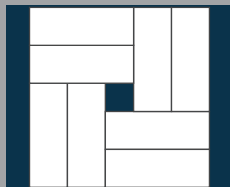

"Where fish is distributed in a controlled distribution chain, it would be beneficial to use boxes with less insulation, to allow chill temperatures to influence product temperatures." *The Sea Fish Industry Authority*
