

COMMITTEE REPORTS

ELECTRICAL COALITION

Toni Jameson, Lythix

Coalition Commenced August 21st, 2013

Initial Coalition Meeting held July 2nd, 2014

Coalition Goals:

To improve customer service and transparency with the utilities in Permian

To ensure the Permian Basin has the appropriate transmission and distribution capacity to serve the Producers needs long term

We have continued to work through Basin reliability issues, protection coordination schemes that affect system reliability and the agenda for a possible PUC meeting in Austin. We are also revisiting service related issues and timelines for in-service dates.

We have had face to face meetings with two of the three major utilities and are continuing that effort going forward to address the customer service issues.

We are planning another face to face with ONCOR for sometime in August 2018 to discuss additional issues.
