

COMMITTEE REPORT

WATER COMMITTEE

Tyler Hussey, Apache Corporation

The PBPA Water Committee was not able to have a Q3 meeting. However, plans for Q4 2021 and 2022 meetings are in progress. The Water Committee will have a meeting focused on H-11 permits (TX commercial produced water recycling) and an update on TX HB 3516 implementation. HB 3516 was passed last session in Texas and attempts to streamline the commercial permit process. Another meeting will focus on induced seismicity given the recent earthquakes in the Midland-Odessa area. The plan is to have a presentation from the Texas Bureau of Economic Geology (BEG) to cover this topic. Another meeting topic will cover ESG, the importance of water conservation and recycling, and how ESG impacts companies' investments and their investors.
