

COMMITTEE REPORTS

ELECTRICAL COALITION

Johnny Carlock, Pioneer Natural Resources

The Electric Coalition did not conduct a member meeting during this quarter, but many members participated in a PBPA joint committee meeting held on October 12, 2020. PBPA staff was working on comments to the RRC on proposed rulemaking efforts.

The joint committee meeting focused on RRC proposed rule 3.65, although some comments were related to RRC proposed rule 3.107. Several members provided feedback to assist with PBPA comments to the RRC, due in late October. Most comments centered around critical designation of wells/facilities and potential opt out ramifications. In addition, many participants expressed a desire to get clarification from the RRC on critical designation criteria and subsequent requirements, such as, winterization. We anticipate a robust interaction following the release of the RRC rule(s), which will support discussion of specific requirements related to industry facilities.

The Coalition will continue to evaluate the results of legislative efforts, regulatory rule making and any subsequent implementation plans.
