

# COMMITTEE REPORTS

## WATER COMMITTEE

Tyler Hussey, Apache Corporation

The PBPA water committee did not have a third quarter meeting. However, the committee did reach out to the Produced Water Management Council to collaborate a response to the DOE's Request for Information on produced water research. The committee plans to have a cooperated response by the RFI due date in October. As we continue to see produced water beneficial reuse grow as a potential alternative to disposal in the eyes of industry and regulators, we will also have future meetings on various reuse technologies and companies operating in this space. While there are still many regulatory hurdles, several companies are beginning to implement beneficial reuse technologies and pilots. The committee will also be monitoring and updating members on produced water-related bills as the TX 88th legislative session begins early next year.
