

KAUFMAN
ENGINEERED SYSTEMS

VIDEO TRAINING PACKAGE

Solving Your Training and Onboarding Obstacles

- Custom designed for your new Kaufman system.
- Great tool for your new employee onboarding process.
- Excellent training enhancement for employees who require an immediate system refresher training.
- Provides your team with as much detail and knowledge on your equipment as if a Kaufman technician is on-site, by your side training you.

Contact Kaufman at Info@KES-USA.com or 419-878-9727
to Learn More About Our Video Training Package

YOUR CUSTOM TRAINING PACKAGE WILL CONSIST OF THE FOLLOWING:

Overview

This video provides a complete overview from product infeed, to full load pick up conveyor. It will walk you through the full sequence of operations of each component of your Kaufman system.

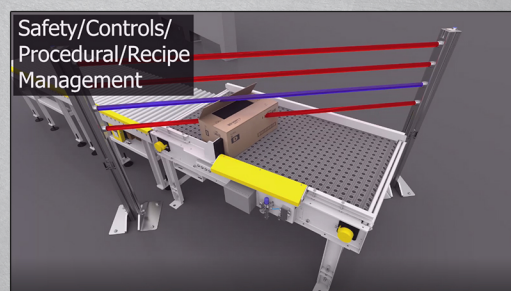

Safety Interface

This video will show operators how to safely interface and access the robot cell and bring the system back online to an automatic state after entering the cell.

Controls Interface

This video reviews the functional descriptions of the controls at all operator stations around the robot cell, HMI interface, and manual jog sequences via HMI.

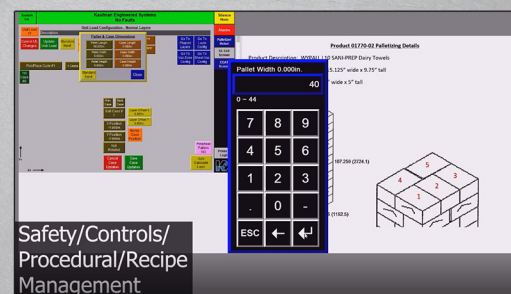

Procedural Video

This video will walk operators through common system interfaces such as fault recovery procedures, HMI confirmation prompts, light curtain override, abort/restart sequences.

Recipe Management Video

This video will outline the sequential steps on how to modify, create, and save new recipes on your Kaufman palletizing system.
