Digital Testing & Vaccination Platform

Secure, simple & ready to use

SiteLabs provides a secure, simple to use testing and vaccination platform that makes it easy for you to start testing or improve your current process - with no monthly fee!

Contact us to get setup!

Email or call us and let our team walk you through the system. No software to install or monthly fees. Simple.

Use Code **SiteLabs20** at check out for your buying group discount!

Save staff time with a streamlined workflow

Using a cell phone, our platform's step by step process makes it easy for your staff to follow our digital protocol. It standardizes your testing or vaccination process and simplifies everything from patient registration to reporting results.

Built for any type of test or vaccine

Our flexible platform can be used with any point of care or lab based diagnostic test or vaccine. It adjusts the digital protocol to meet the unique requirements of each.

Pay-as-you-go pricing

Simply pay for the tests or vaccines you conduct. No other monthly charges.

Integrated scheduling & payments

Easily add our scheduling and payment app to your website to save staffing time..

QR code based

Our unique QR code makes it easy to scan in patients, scan tests and connect test results.

Digital Health Pass™

Your patient's QR code stores their test and vaccination results right in their digital wallet.
