

The VaxServe[®] Partnership

You don't see your patients as just *patients*.

You see them as more than that. You see them as what they are—your neighbors and even your friends. It's this mutual trust and understanding, along with exceptional customer service, that you've built your business upon.

Like you, VaxServe appreciates the importance of strong partnerships. It's values like this one, which you instill through your day-to-day interactions with patients, that will strengthen our partnership with you.

At VaxServe, we offer quality service and educational resources along with vaccines at a competitive price.

Working together has its advantages

We have the expertise

Our capability as an immunization solutions provider comes with 20 years of extensive experience as the largest non-hospital vaccine distributor in the United States. As a wholly-owned subsidiary of Sanofi Pasteur Inc., we're backed by their decades of experience, heritage, reliability, and dependability.

It's because of this partnership and tenure in the flu vaccine market that we can help enhance the experience and provide age-specific vaccine options for your patients—all at competitive pricing.

We want to help grow your business

One of the best ways to expand your business is by growing the relationships you have with your patients. We aim to provide you with the tools you need to do this by:

- Helping to increase both adult and adolescent immunization rates
- Working with you to create a year-round immunization program
- Providing you with clinical and operational support for your immunization program
- Delivering patient and staff education materials, reminder/recall tools, and support for navigating the evolving role of community pharmacy

We're dedicated to the success of your immunization campaign

Our goal as a specialty distributor and solutions provider is to support your expansion of vaccination programs. For nearly two decades, we've successfully developed a range of tools and materials for pharmacy immunization programs, including:

- Influenza
- Travel
- Tdap
- Immunizations focusing on seniors, adolescents, and pediatrics

We simplify ordering and implementation

We understand your number one priority is maintaining relationships with your patients, which is why we've streamlined the vaccine ordering process to make it as simple as possible. We're able to assist you whenever you need help.
