

# Choose FillPure

## For Your Pharmacy's Purified Water Needs

Water quality is a hot topic in pharmacy these days. While most pharmacies only need purified water for simple things like reconstitution of antibiotics and cleaning of equipment, understanding and meeting USP standards can be difficult, confusing, and expensive. It doesn't have to be.

**At FillPure, our mission is to ensure your pharmacy has clean, safe purified water that exceeds USP standards and doesn't break the bank. We think about the quality of your pharmacy's water so you don't have to.**

To receive special FPN Member pricing send an email to [info@fillmastersystems.com](mailto:info@fillmastersystems.com) or call **800-884-5771 x402**.

We also offer great bundle packages when you choose a Fillmaster automated water dispenser, like the powerful new Fillmaster Auto, with your water purification system.
